DETAILED ACTION

Specification

1. The abstract is objected to because of the following informalities: the abstract should be limited to 150 words; and the form and legal phraseology often used in patent claims, such as "means", should be avoided.
2. The disclosure is objected to because of the following informalities: the specification appears to be a literal translation into English from a foreign document and is replete with grammatical and idiomatic errors. Appropriate correction is required.

Claim Objections

3. Claims 1-16 are objected to because of the following informalities: the claims appear to be a literal translation into English from a foreign document and are replete with grammatical errors and indefinite language. Appropriate correction is required.
4. For example, in claim 1, line 1, the phrase "A device by a tool" is unclear, and in claim 1, lines 4-5, it is unclear if "tubing, lowered into the well" is part of the claimed invention.

Allowable Subject Matter

5. Claims 1-16 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to show or suggest the tool as claimed in detail, specifically wherein the third housing element is formed with more chambers of the hardenable sealing substance than chambers for the well fluid supplied from the pipe string, whereby the packer element is inflated into sealing abutment against the wall of the well bore by a lower pressure than the pressure from the well fluid supplied to the housing element.

Conclusion

7. This application is in condition for allowance except for the formal matters discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
